Asleep on my feet, to be honest. But there's a couple of things I'd like to know before I hit the hay, or my curiosity will probably keep me awake.

If you can\u2019t get friends together for a game night this one is for you. With about three hundred games (around two and a half if you don\u2019t count strange indie projects, but still) I have enough variety for months of game nights! Can\u2019t wait! 10\/10. In lack of Very Organized Thief, Sneak Thief!. This game is a lot of fun for the price, but there are a few things I would like to see improved.
-More customizable point limits: With powerups off, 1000 ends too quickly and 5000 takes ages.
-Better powerups: I love the powerups, but they don't last long enough to feel like they made a huge impact.
- 4 PLAYER VS: It would be awesome.

Overall, I'm happy with the game. I can't wait to see what happens once it's out ofearly access.. Want to love simulation games and can't wrap your head around massive numbers and calculations, strenuous start-up procedures and lack of proper tutorials?

Step forth Post Master. Excalibur brings a neat little simulation-lite that will tickle your management requirements without drowning you in complicated elements.

Take your post office to the top, crush your rival and own the city. As the game continues, the city expands and the oppurtunities increase, this also means you're constantly having to re-think post office placement and routes.

My one gripe in the game is that there is only a single rival post office, having multiple rivals would be fun for people who find one rival too easy - you can eliminate them from the game completely.. With low profile PC and no steering wheel it's littleb it boring. Keep developing the game, then it can be pretty good.. I find this game excellent .
I have been playing for some time now and are a learn as you go (trial & error) player and find it a great way to creat your own city , countryside,farmland,etc.
I recomened this game to anyone with great imagination.. I had hopes for this, I really did. I played for 30 minutes and was bored, and amazed at how flawed the game is. Sure Early Access, shut it.

You have speakers that you have to set up, those speakers have a small range of when people can "Hear it" a mechanic that is just stupid. You can have speakers in the living area of the house, yet people will walk into the bathroom and go " Where is Music" and then dislike the party and walk out. What? The game expects me to put speakers in EVERY spot of the house, including the bathroom. Do my speakers that Im spending 2 grand on only go for a few feet? How ♥♥♥♥ing dumb is that?

The tut was one of the worst ones I have ever encountered. Your using your phone to talk to someone who just happens to find out our just starting, then offers to help. By sending a bunch of pictures all at once and then saying "You got all that?" It doesnt walk you through anything, it just slams it in your lap then sends you off into a map.

This game is just not finished, or polished. Its in early access and I dont think much of it will change. Refunded within 30 minutes, not fun category.

How did I miss this gem! This is very polished and very immersive wish I had picked this one up much earlier!. I just loved this game. It was fun, sensitive and beautiful.. If you want a new shoot 'em up specifically in the vein of Gradius, you'll find it here. While the graphics and music might be a little cheesy or off-putting, the weapons, stages, and bosses will literally blow you away, and you'll love every second of it. I've started a new run maybe thirty times and only recently beat it, so expect plenty of deaths and game overs, but pushing yourself a little harder to reach the next insane boss or stage is totally worth it.

The weapons are pretty standard, but the power-up system is just different enough to catch you off guard when you finally bite it and lose a few points and your weapons power down. Thankfully, while the game is pretty hardcore and the bosses are totally nuts, there are several checkpoints and mid-points during stages and boss fights that give you a few upgrades so you're not totally ruined when you twitched into a ceiling or missile just seconds from a victory.. Recommend !!!!

. Like others have said, its far too over simplified as is. We'll see if the DLC makes a difference when it comes down to $5. Shame because it has a lot of potential otherwise.
. Review is currently based on my first time playing, single player in desktop mode.

Simplistic dungeon runner game.
Either try to run like hell or fight your way through.

Does not appear to be a ton of depth behind it, but I only made it to level 4 and completed two runs.
Currently only four weapons to choose from, would love to see upgrades and new weapon types!
Character leveling is linear and Im not exactly sure what you get for leveling up.

Cant say I would buy it again at the current price.
Like a lot of these games, the potential is there... just keep going with it!

I am excited to try the boss battles in VR though!
Will update my review afterwards.. Pretty decent top down shooter with a almost galaga feel. There are only two different ships and three different stages (four if you include the bonus stage) which means the game won't take a lot of time to complete, however the game has a lot of replay value which means the limited selection doesn't really take anything away from it.
